AURA Comfort Duo

Time for two

We all spend approximately one-third of our lives in bed. The way in which we spend this time has a direct influence on our well-being, our health, and our attitude to life. The AURA Comfort Duo has been specially developed for couples who place value on having exceptional comfort, stylish design, and top-class workmanship.

The AURA Comfort Duo gives you the freedom to harmoniously combine individual comfort requirements: The two separately adjustable sleeping surfaces ensure that everyone finds the perfect position – be it for reading, watching TV, or getting a restful night's sleep.

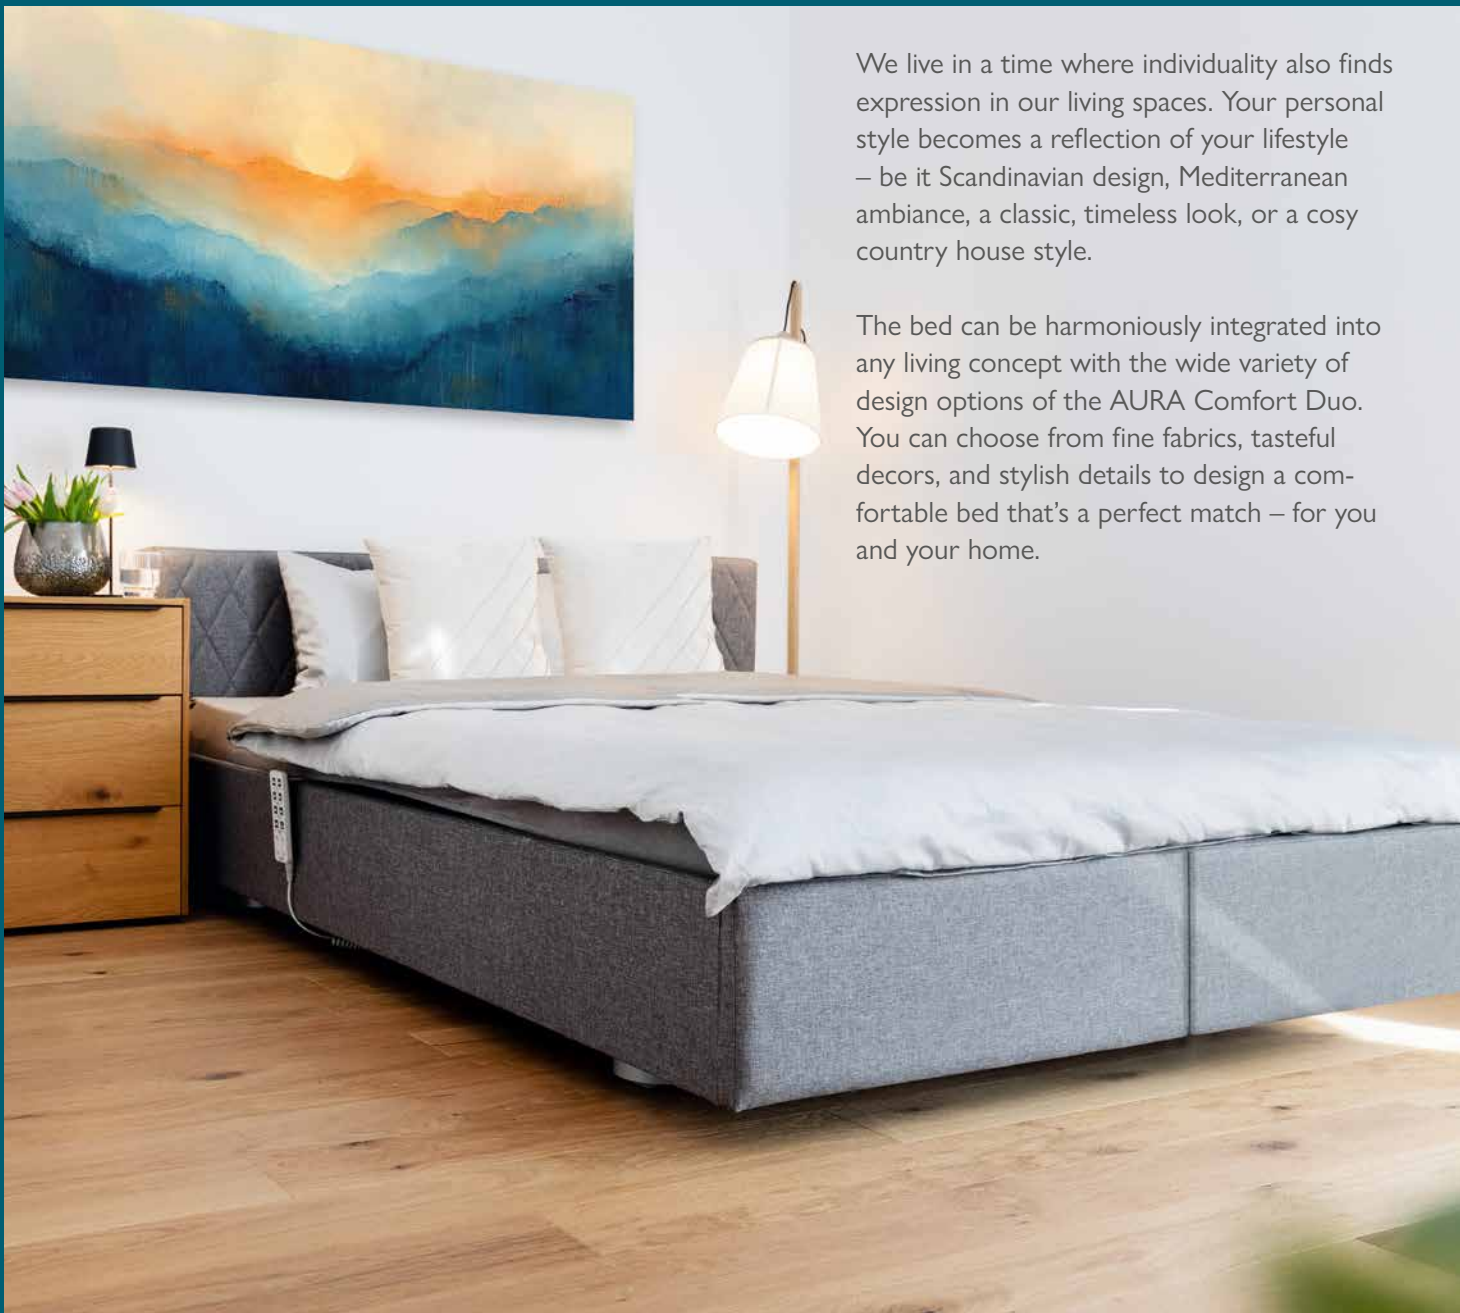

In addition to its outstanding functionality, the AURA Comfort Duo impresses with its homely aesthetics. The clean lines, fine fabrics, and timeless elegance blend harmoniously into your bedroom, creating an atmosphere of peace and relaxation. A bed that is much more than just a piece of furniture – it is a place for moments of well-being, shared relaxation, and better quality of life.

Style for two

We live in a time where individuality also finds expression in our living spaces. Your personal style becomes a reflection of your lifestyle – be it Scandinavian design, Mediterranean ambiance, a classic, timeless look, or a cosy country house style.

The bed can be harmoniously integrated into any living concept with the wide variety of design options of the AURA Comfort Duo. You can choose from fine fabrics, tasteful decors, and stylish details to design a comfortable bed that's a perfect match – for you and your home.

Variety for two

The wide range of wood decors makes it possible for the AURA Comfort Duo bed conversion to be individually adapted to any interior design style.

Numerous modern upholstery options in fabric or leather bring cosiness and well-being into your bedroom.

FUNCTIONAL

CLOSE TO THE FLOOR

With the possibility of lowering the bed to just 25 cm, the AURA Comfort Duo provides additional safety and comfort. The close-to-the-floor position provides a calming effect while you are sleeping and resting, ensuring that you get a comfortable night's sleep.

MOBILISING

The transfer position of the AURA Comfort Duo effortlessly puts you into a convenient entry and exit position. In conjunction with the optional mobilisation aid, you can enjoy comfortable support at all times – for a relaxing start to the day and an equally comfortable bedtime in the evening.

ERGONOMIC

The practical working height makes everyday bedtime tasks easier. Be it making the bed or providing better access to the floor for cleaning – the AURA Comfort Duo looks after your back and makes your work noticeably more pleasant.

COMFORTABLE

Whether you want to relax and watch TV, enjoy breakfast in bed, or simply wind down at the end of the day – the AURA Comfort Duo gives you maximum comfort with its comfortably adjustable seating position. The backrest and the leg support can be individually adjusted to your requirements.

Perfection for two

Handset with LED lighting – Modern, safe and intuitive

The modern design of the AURA Comfort Duo handset impresses with its clear design language and intuitive operation. The discreet LED button illumination provides reliable orientation, even during the night. Easy-to-understand symbols and the ability to lock individual functions if required give you additional safety and comfort – day after day.

Comfort for two

The two individually adjustable sleeping surfaces of the AURA Comfort Duo adapt perfectly to your body shape, noticeably supporting the sensitive areas of the shoulders and lumbar vertebrae. The intelligent mechanism also ensures that you sleep restfully and sit comfortably: In the sitting position, the backrest retracts discreetly, preventing unpleasant pressure points in the posterior area – for noticeably more comfort.

ALSO INCLUDED...

CURA bedside lamp

Whether you're reading an exciting novel or spending a cosy evening in bed – the CURA bedside lamp creates the right mood with its warm white light. With an elegant design and directly connectable to the bed control system, it avoids tangled cables and provides light exactly where you need it – in a stylish and comfortable way.

Mattresses

Good mattresses are essential for a perfect and restful sleep. Contact us. We'll find the right mattress for you.
